

LEWIS BLOCK & SUPPLY COMPANY

www.LewisBlock.com

Material Provider of Retaining Walls, Block, Pavers, & MSE Panels for the construction industry

“Best on the block”

Summer 2010

Business This Year

By: Dwayne Lewis
President

This has been a challenging year for Lewis Block & Supply. The economy has made things a little tougher for all of us, and the construction industry is no exception. There are less jobs and margins have become less handsome. But I've learned to ride the waves of business and stay above water.

I believe times like these test our ability to make our business as efficient as possible. Things like testing operations for efficiency and better managing cash flow can make a huge difference.

The people that do survive this “recession” will emerge successful and stronger, and that is exactly what I intend to do. Through these challenges LBS is still going strong. I'm still working hard to make sure we are one of those companies that comes out on the other side. I've gotten smarter about the bid process and we have landed jobs including the Kauffman Performing Arts Center and the Historic Lincoln Building.

Best Wishes!

MSE Wall

Welcome Strengthened Soil Walls

I'm pleased to welcome Strengthened Soil Walls to the Lewis Block & Supply family. Strengthened designs, supplies, and installs Mechanically Stabilized Earth (MSE) Walls. The walls contain CE certified Secugrid Geogrid.

Strengthened Soil is a worldwide company that has been in business for 20 years. Their MSE walls are dependable in all climates, from the coldest temperatures in North America to the warm weather in the Gulf.

I know the addition of Strengthened Soil will prove beneficial to Lewis Block & Supply and our clients.

Current LBS Projects

City of Warsaw Steamboat Landing

- Kauffman Performing Arts Center - Granite Pavers
- K-State Child Development Center - Permeable Pavers
- City of Warsaw Steamboat Landing (pictured)– Big Block sea wall
